(54) WEATHER STRIP FOR SUNROOF

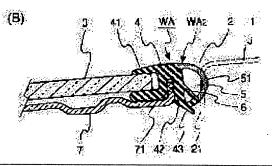

(57)Abstract:

PROBLEM TO BE SOLVED: To reduce wear of a seal wall of a weather strip by improving slidability of the weather strip, which is installed around a sunroof lid of an automobile, against an edge of a

roof opening.

SOLUTION: A weather strip WA is provided with an installation base portion 4 installed around a sunroof lid 3, a hollow seal portion 5 where a seal wall 51 is pressed against an edge 21 of a roof opening 2, and a bridge 6 connecting a seal wall 51 and the installation base portion 4 in the seal portion 5. At a front edge portion WA1 the weather strip WA, a connecting portion of a lower end of the seal wall 51 with the installation base portion 4 is separated therefrom to absorb a reaction force of the opening edge 21 which acts against the seal wall 51 by movement of the lower end of the seal wall 51. Therefore, rubbing of the seal wall 51 against the opening edge 21 when the lid 3 is tilted is reduced.
